

MY POOL COVER

The Ultimate Pool Cover Solutions for Residential & Commercial Projects Across the GCC.
European innovation. Proudly assembled in KEZAD, Abu Dhabi

Innovation. Safety. Sustainability. Comfort. [→](#)

ABOUT US

YOUR TRUSTED POOL COVER PARTNER IN THE GCC

MyPoolCover, powered by **Terra & Aqua Arabia**, delivers engineered swimming pool covers and movable floor solutions designed around four core principles: **Safety, Sustainability, Comfort, and Cost Efficiency.**

Led by award-winning aquatic engineer Bart Lauwers, with over **30 years** of international expertise, we combine advanced European innovation with precision regional execution.

Supported by Terra & Aqua Arabia's product ecosystem, we manage everything **in-house** - from design and measurement to installation and after-sales support - ensuring **seamless delivery, technical excellence**, and complete peace of mind across the UAE.

LOCALLY MADE. GLOBALLY INSPIRED.

CRAFTING SAFER, SMARTER, AND SUSTAINABLE OUTDOOR LIVING

At **MyPoolCover**, we go far beyond being a product provider. We are specialists in luxury outdoor lifestyle solutions designed to elevate, protect, and sustain. Rooted in innovation and engineered for excellence, our pool covers are created with a clear purpose - combining refined aesthetics with uncompromising safety and long-term sustainability. Proudly assembled in the UAE at our Terra and Aqua Manufacturing **headquarters in KEZAD, Abu Dhabi**, all MyPoolCover products reflect our commitment to local expertise, precision engineering, and world-class quality standards.

Aligned with the **UAE Vision 2030**, we are passionate about contributing to a greener, smarter, and more secure future. Every product we create demonstrates our dedication to sustainable development, water conservation, and thoughtful craftsmanship - ensuring every pool is protected with intention and integrity.

With a full-scale, end-to-end offering, MyPoolCover delivers in-house engineering, precision assembly, seamless installation, and dedicated after-sales support, providing exceptional reliability and performance across the Emirates.

OUR MISSION

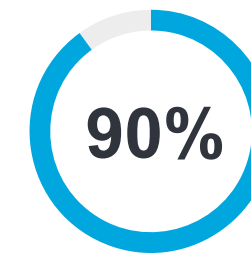

To deliver premium pool protection solutions that give families complete peace of mind, while actively contributing to a safer, smarter, and more sustainable future for the UAE.

SAFETY FIRST / LOWEST RUNNING COSTS

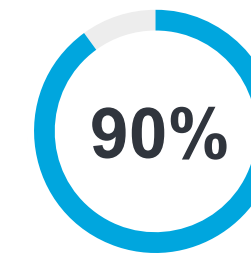

WHY COVER YOUR POOL?

A pool cover isn't an accessory - it's a long-term operational decision.

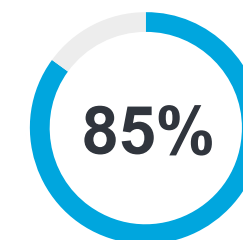

Reduced **Cleaning** Needs

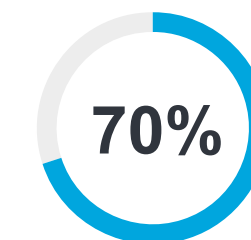

Reduced **Evaporation**

Reduced **Electricity** Costs

Reduced **Chemical** Use

Reduced **Temperature** Control Costs

MY POOL COVER PRODUCT LINE

COVERSEAL

Zip up your pool - Elegant design, robust engineering, and absolute safety in one sleek solution.

ROLLO

Automatic slatted pool covers - in stock and ready in 10 days!

MOVABLE FLOORS

From swimming pool to party deck at the touch of a button. Smart luxury, unmatched safety, versatility and property value.

THE NEXT GENERATION OF POOL PROTECTION

COVERSEAL

Coverseal represents a breakthrough in pool cover technology combining elegant design, robust engineering, and 100% safety in one sleek solution. Developed for discerning clients who value innovation, functionality, and aesthetics, Coverseal is built with a patented rigid frame and reinforced, UV-resistant membrane that forms a near-airtight seal across the pool surface.

This advanced system protects against dust, debris, and water evaporation while enhancing the visual appeal of luxury outdoor spaces. Whether for private residences, boutique hotels, or architectural projects, Coverseal delivers both peace of mind and premium presentation.

Coverseal strikes the perfect balance between ease of use and mechanical simplicity. The integrated battery-powered mechanism provides assisted movement requiring only a gentle push to begin operation. The cover then guides itself smoothly across the pool, locking into place with precision. No external power, no complex setup - just smart, intuitive engineering.

Installed in just 21 days from order confirmation!

WHY COVERSEAL?

Stretched Reinforced Fabric

Self-Draining No Cover Pump

Self Sufficient Solar-Powered

100% Safety

CONFIGURATIONS & OPTIONS

LIFTS

Lift the housing to clear obstacles and rest it on the ground when the cover is not in used

MAX SIZES

Coverseal sizes: 6m x 16m

ALL TERRAIN TRACKS

Reinforced tracks strengthening the attachments on uneven pool decks

POWER SUPPLY

Charge the battery when you have no access to sunlight, usually in an indoor pool setting

COVERSEAL FEATURES

With its award-winning design and uncompromising performance, Coverseal redefines what a pool cover should be: safe, sophisticated, and seamlessly integrated into your lifestyle.

Minimalist, customizable design blends into any outdoor environment or makes a striking design statement

Supports up to 250 kg, ensuring safety for children, pets, and snow load conditions

Reinforced PVC membrane is UV- and chemical-resistant, offered in multiple color options

Complies with the strict NF P90-308 safety standard for total peace of mind. 100% Pool safety with a closing zip-system

Semi-automatic movement allows easy manual control with mechanical assistance—no electricity required

Patented sealing system provides exceptional insulation and keeps the pool clean year-round

Low-profile 10 mm guide rail ensures discreet integration and eliminates tripping hazards

"By manufacturing locally we are not only supporting the UAE economy, we're helping shape a smarter, self-reliant future."

— Bart Lauwers, founder of My Pool Cover

SLATTED AUTOMATIC COVERS

ROLLO

Rollo is the elegant, energy-efficient solution for automatic pool protection - ideal for both new and existing pools. This slatted cover enhances safety, reduces operational costs by up to **85%**, and preserves water quality by shielding against dust, debris, and evaporation.

Whether integrated into a new build or retrofitted into an existing pool, Rollo adapts through a variety of configurations: hidden floor pits, floating bench systems, or stylish above-ground housings. Engineered slats - available in Polycarbonate (white and transparent coming soon) to keep your water cool at a minimal cost.

In stock and ready in just 10 days!

CONFIGURATIONS

Terrace

High Water Level (Skimmer-free)

Beach (Infinity-edge pools)

Floor (Hidden in floor pit)

Backpack (Above-ground retrofit)

Bench (Functional seating integration)

WHY ROLLO?

Durable Slatted Design

Automatic Operation

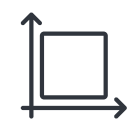

Energy Efficient Options

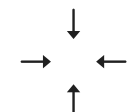

CONFIGURATIONS & OPTIONS

CONTROL & AUTOMATION
Integrates with pool management systems.

MAX SIZES
Rollo sizes : maximum 6m x 25m

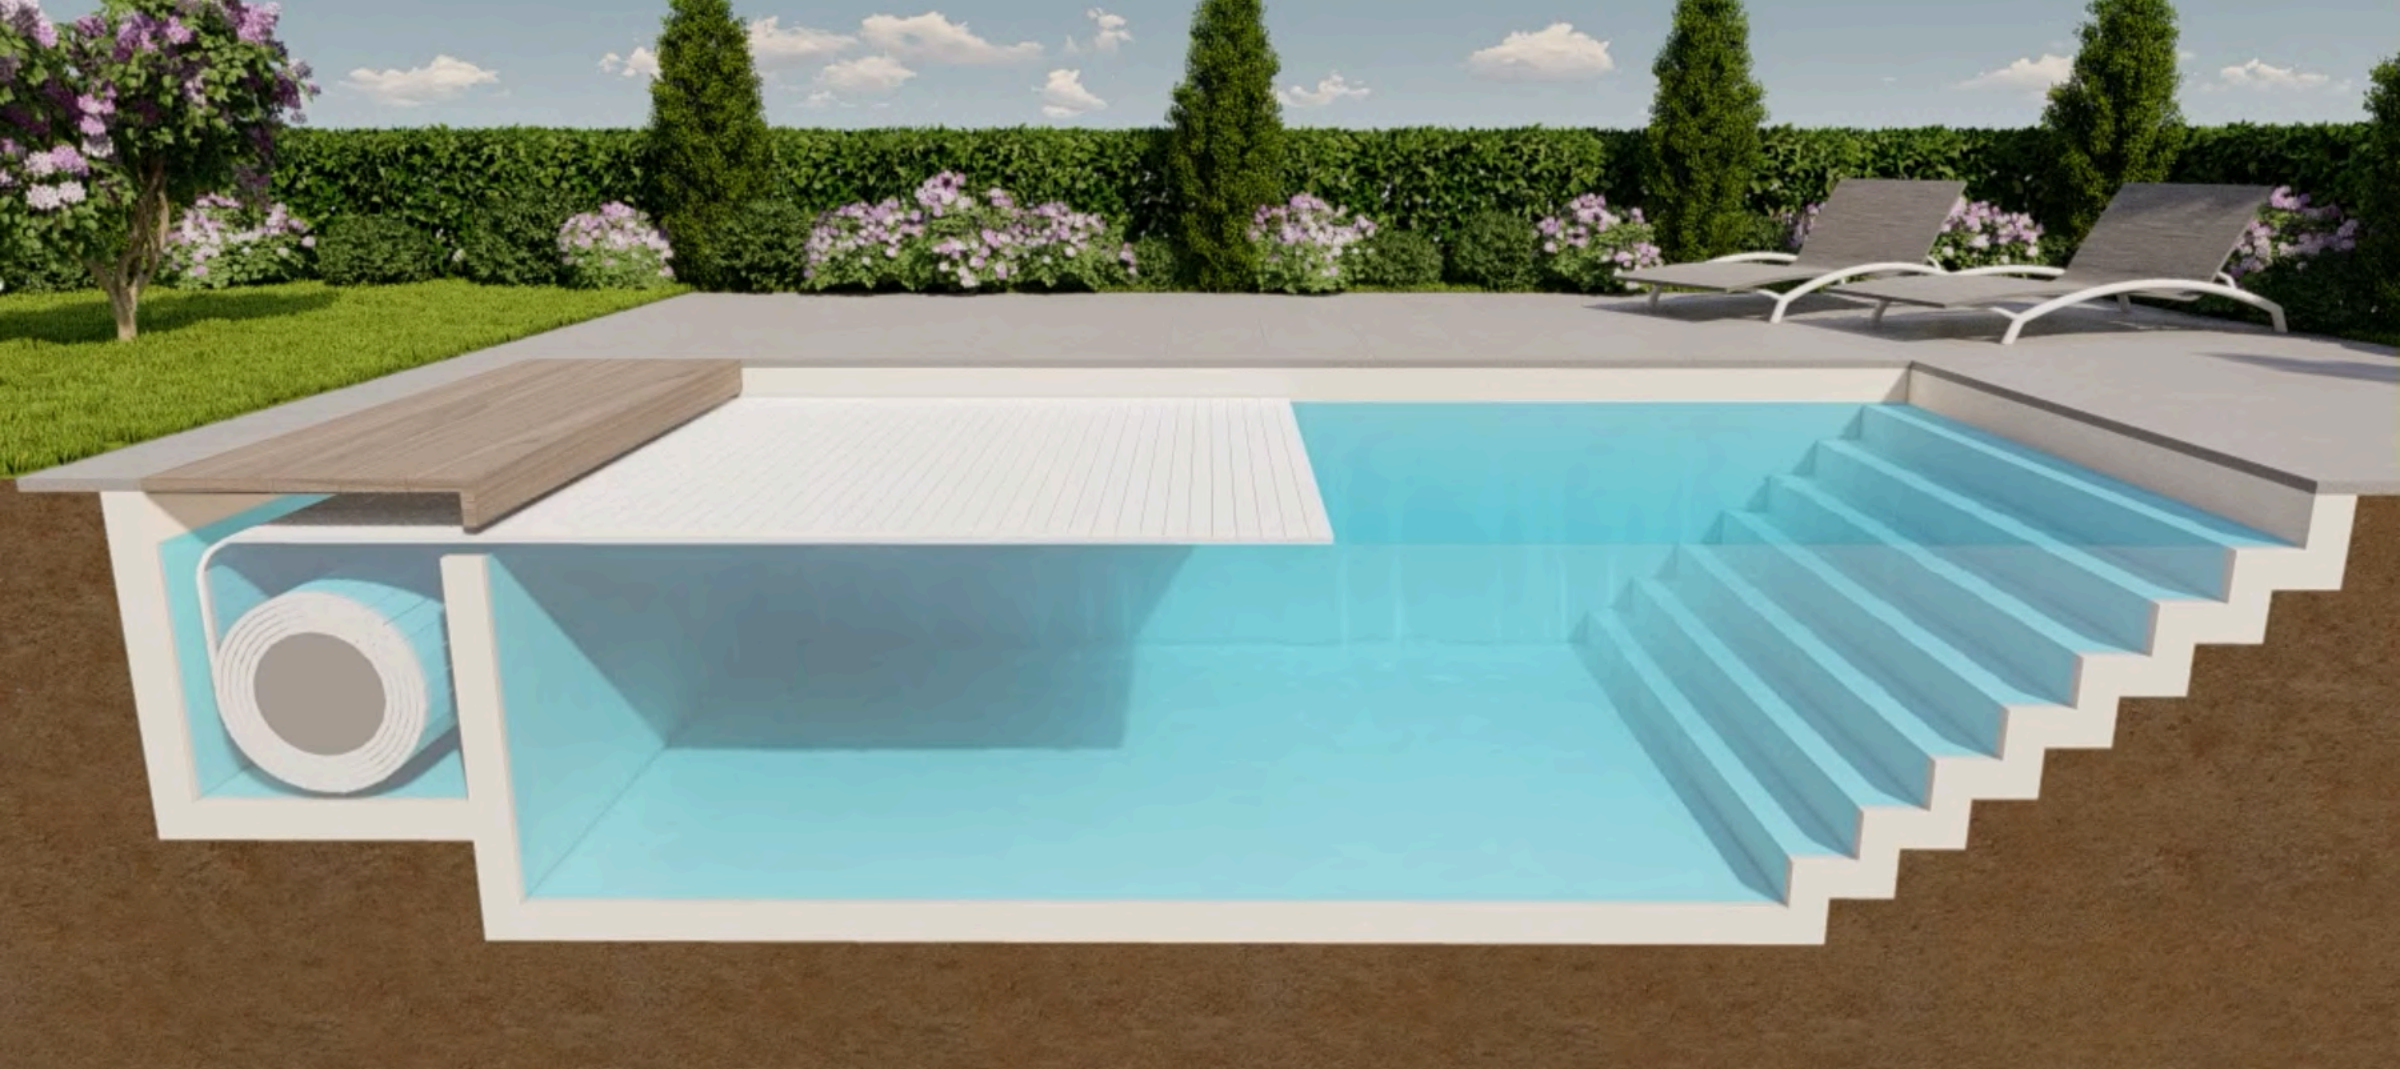

LATERAL FIT
Low-profile tracks and recessed installations help avoid obstructions

POWER SUPPLY
Wired low-voltage or 24V DC system.

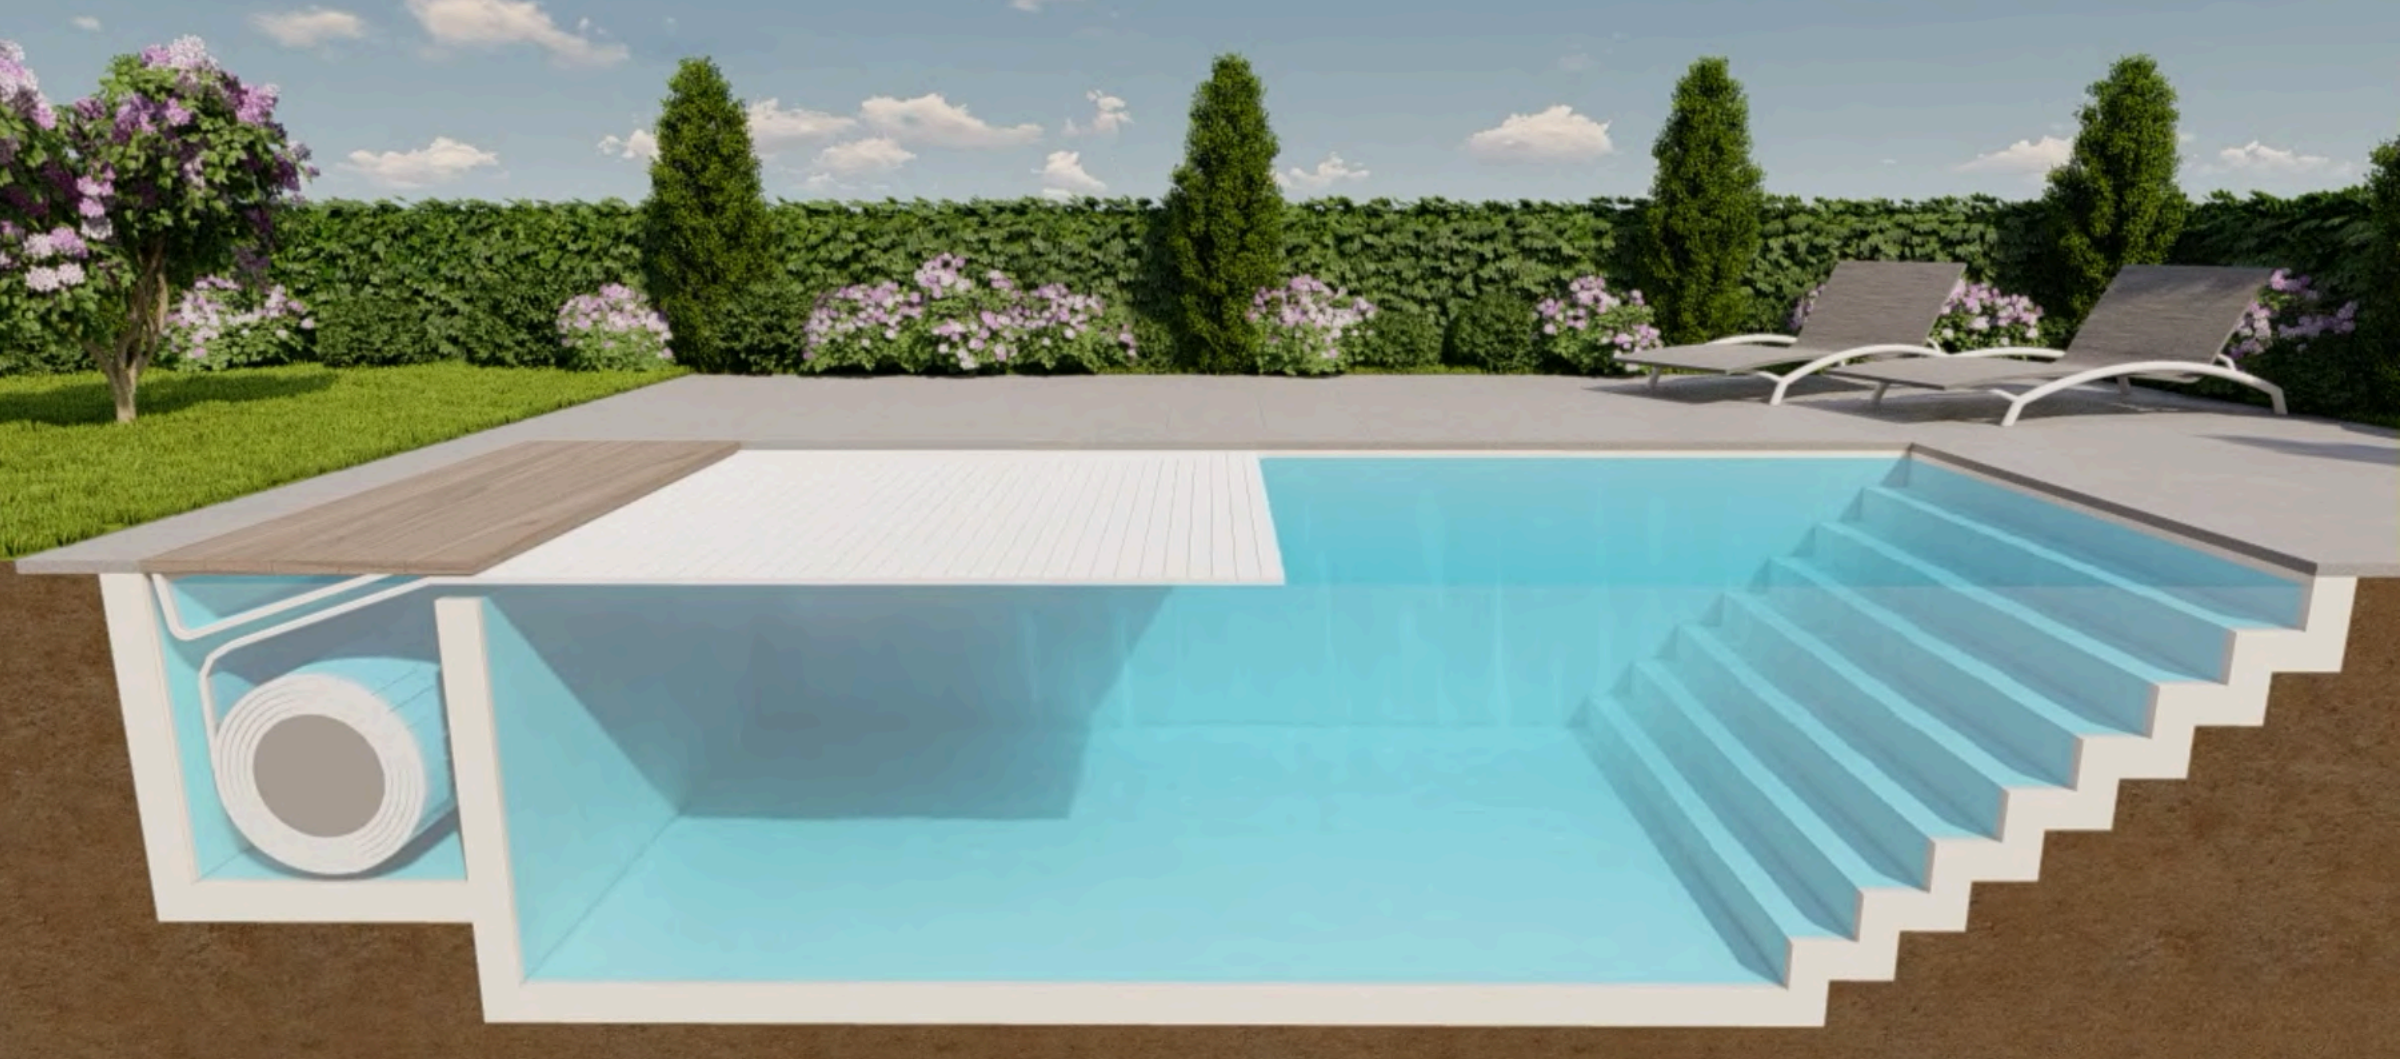

TRACK OPTIONS
Flush or above-deck tracks. Designed for both flat and irregular/uneven decks

UNDERWATER MOUNT IN PIT - TERRACE

The cover pit behind the pool is a well-known classic. Between the pool and the pit, there's a concrete wall or a tailor-made panel out of fiberglass.

Configuration	Skimmer	Overflow	Infinity
A - Terrace	Yes	No	No

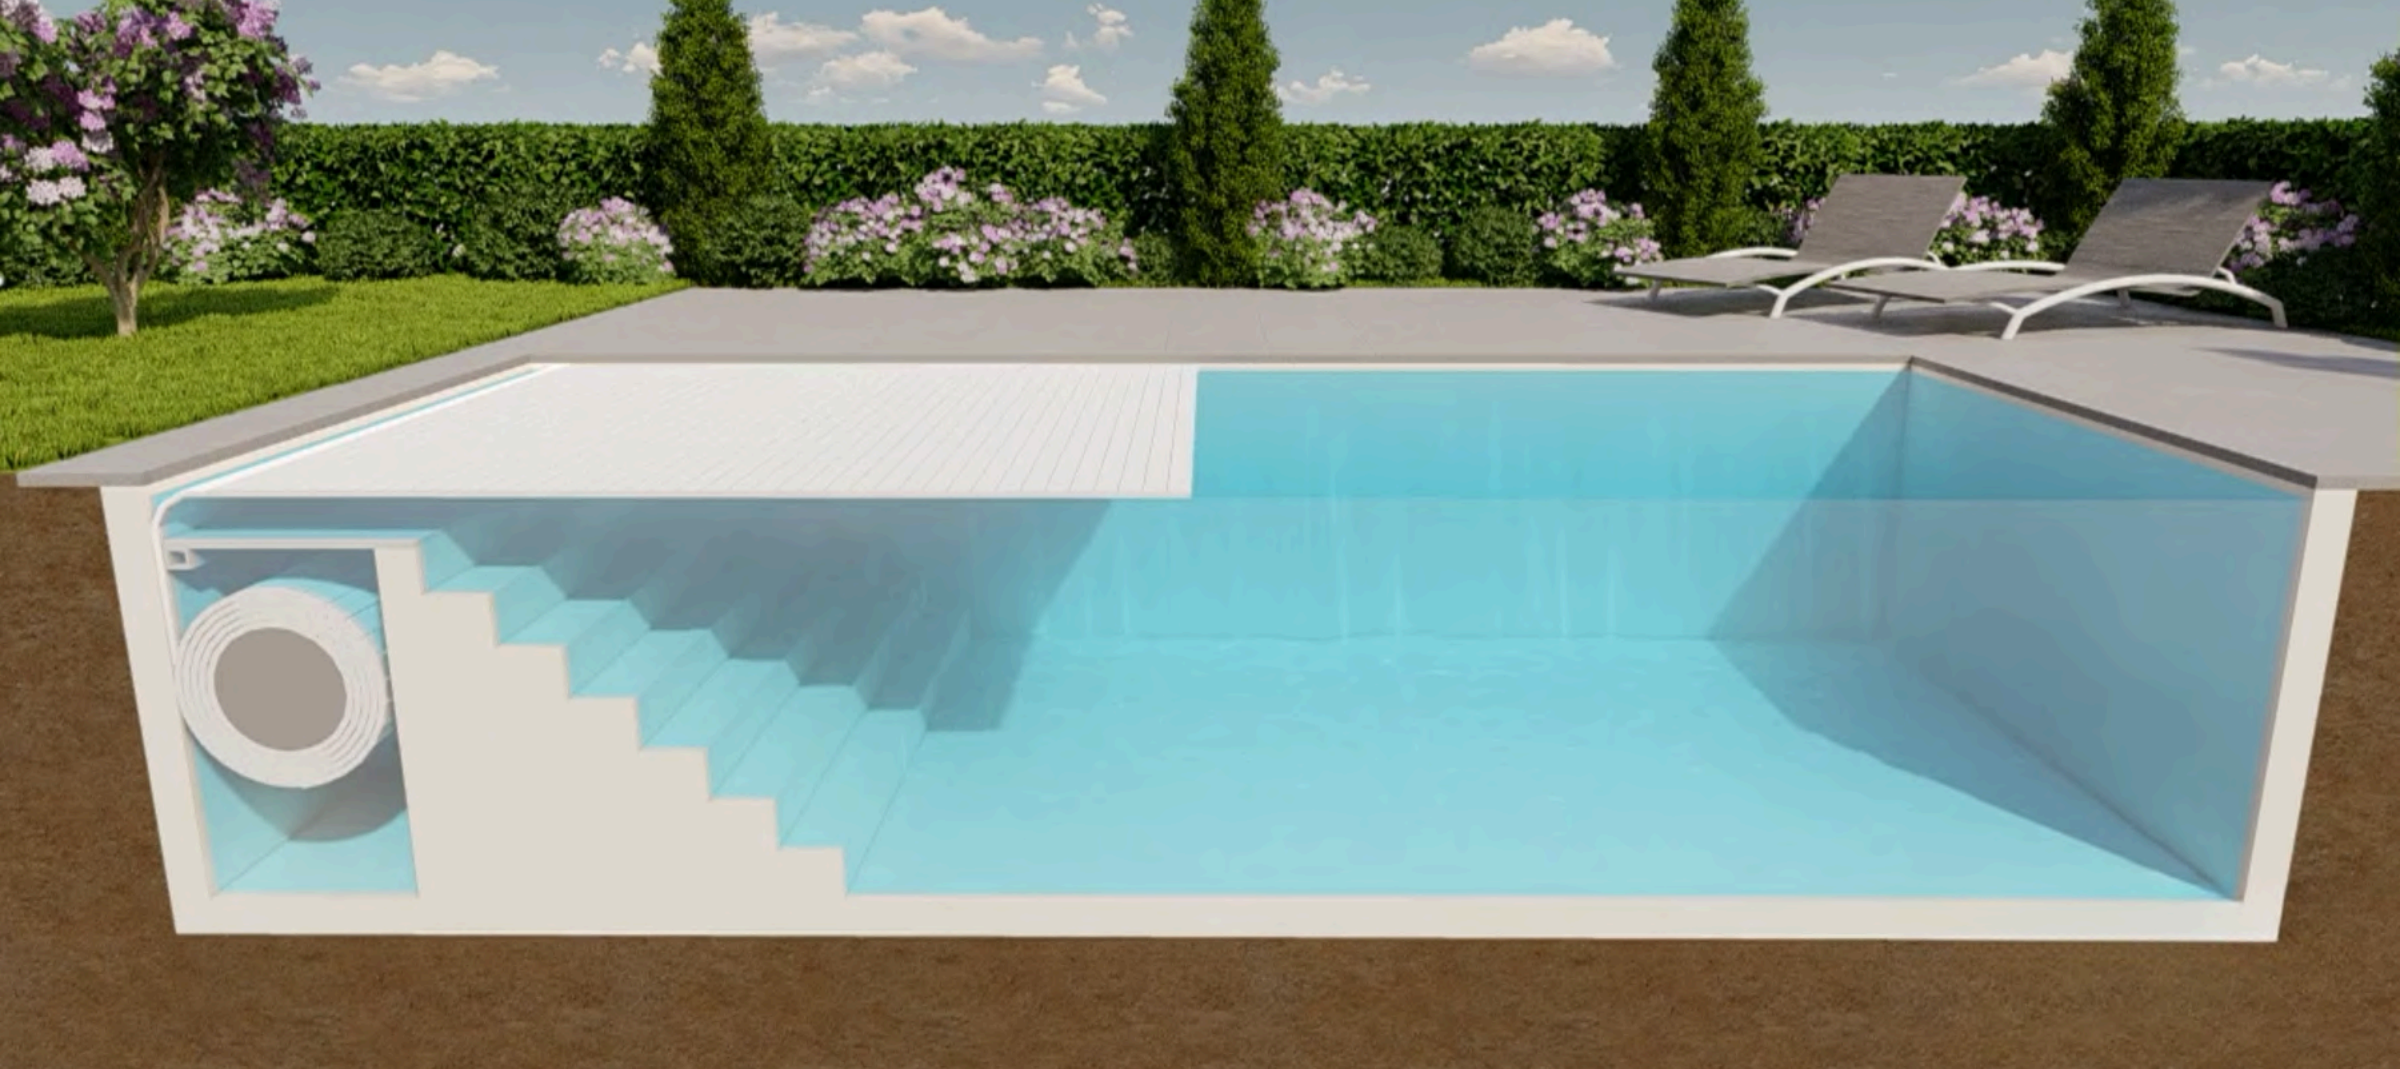

UNDERWATER MOUNT IN PIT WITH HIGH WATER LEVEL - TERRACE

(Skimmer-free)

This version is especially interesting if you want to have a very high water level. Often, this water level is reached using special skimmers or an overflow channel (infinity pool) on 1 side of the pool.

Configuration	Skimmer	Overflow	Infinity
B - High WL	Yes	No	No

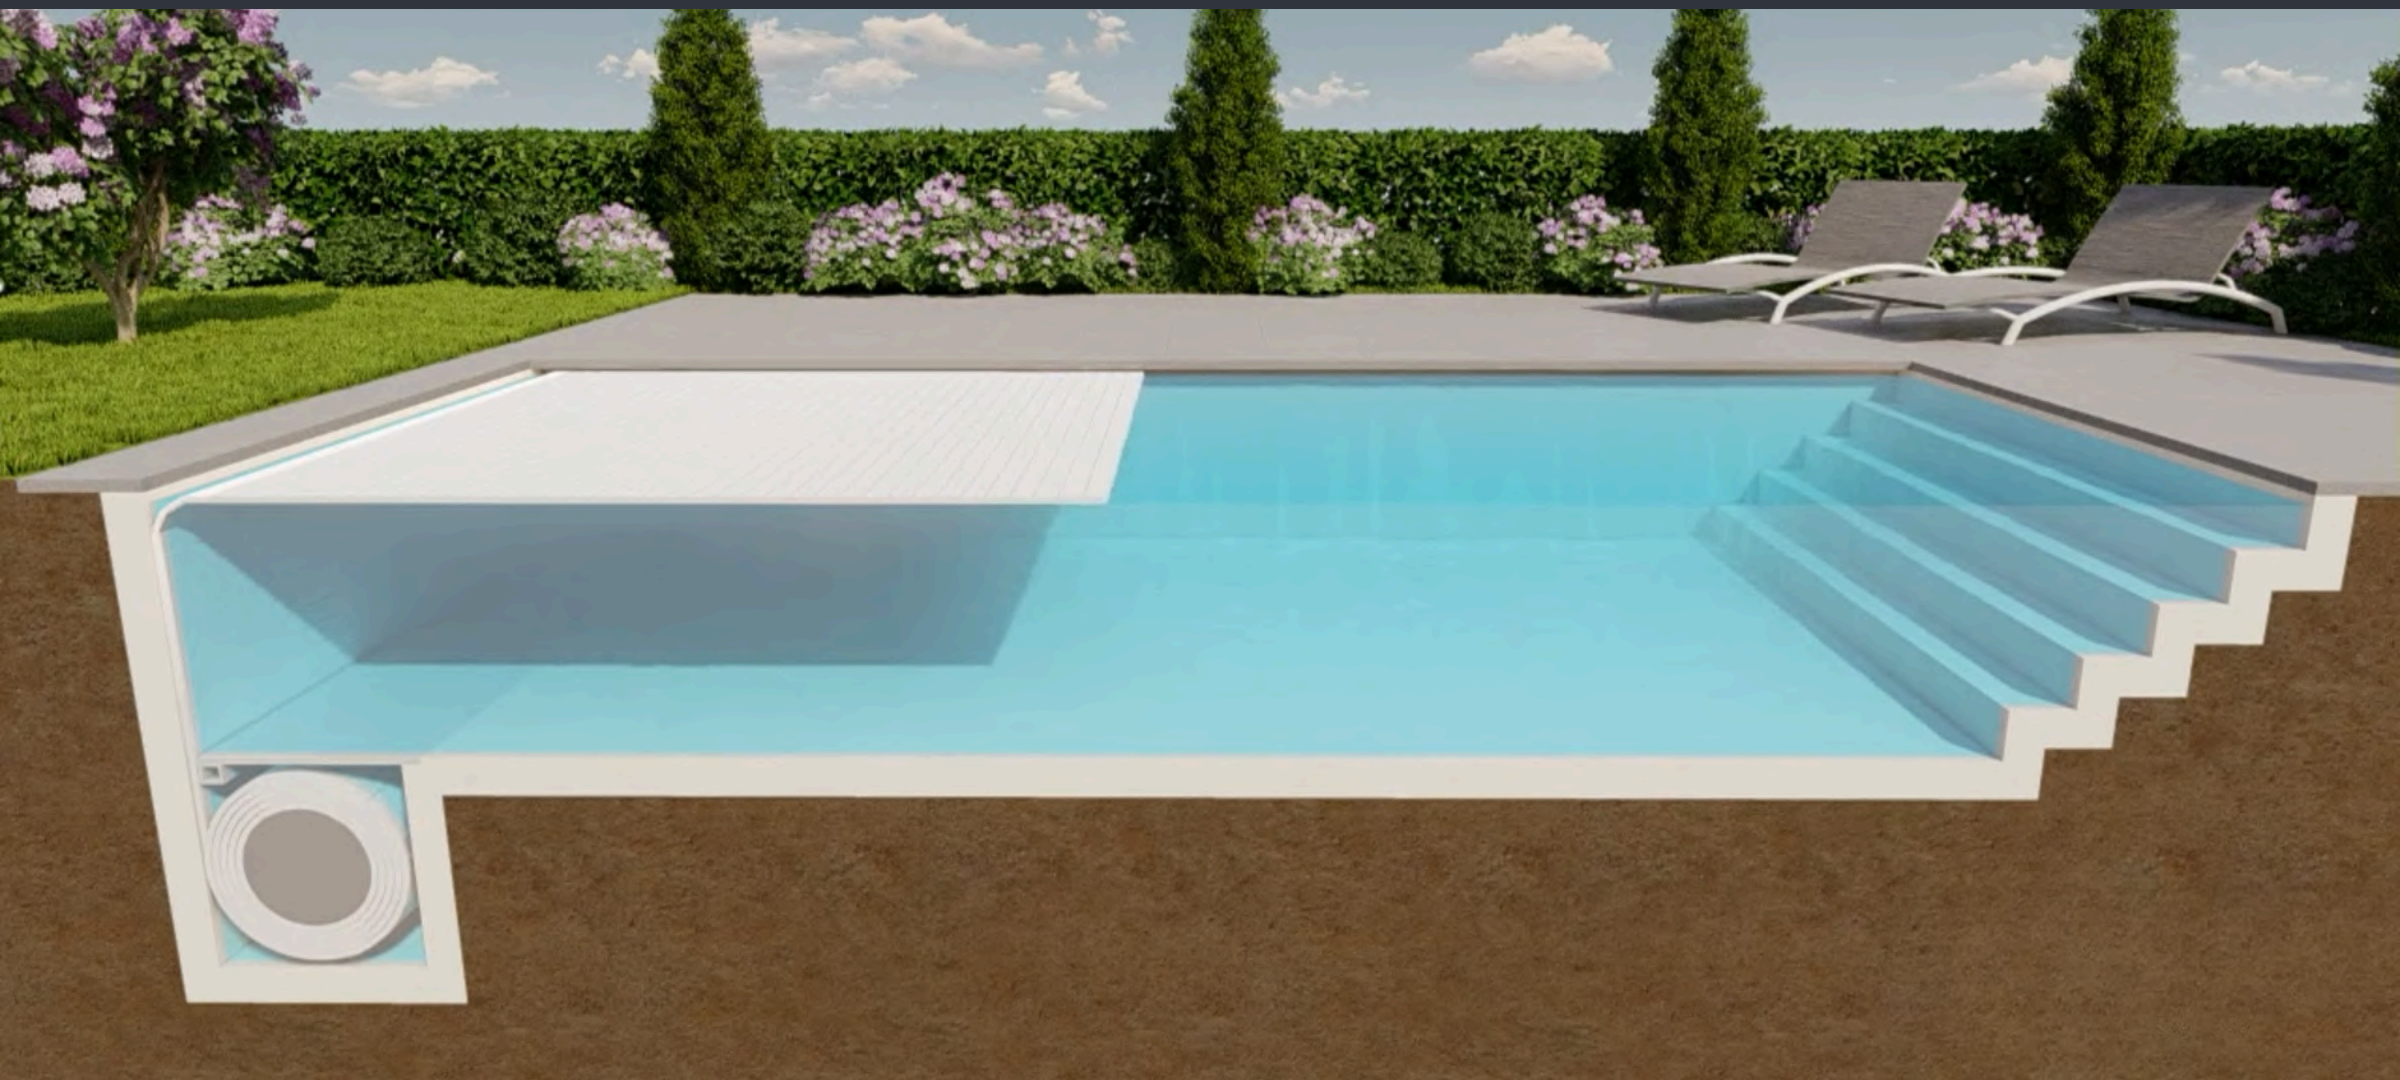

UNDERWATER MOUNT IN STAIRS OR SHALLOW WATER ZONE - BEACH

(Infinity-edge pools)

This version is very stylish and can be applied in new pools or pool renovations. The pool cover is integrated in the first step of the stairs or shallow water zone.

Configuration	Skimmer	Overflow	Infinity
C - Beach	Yes	Yes	Yes

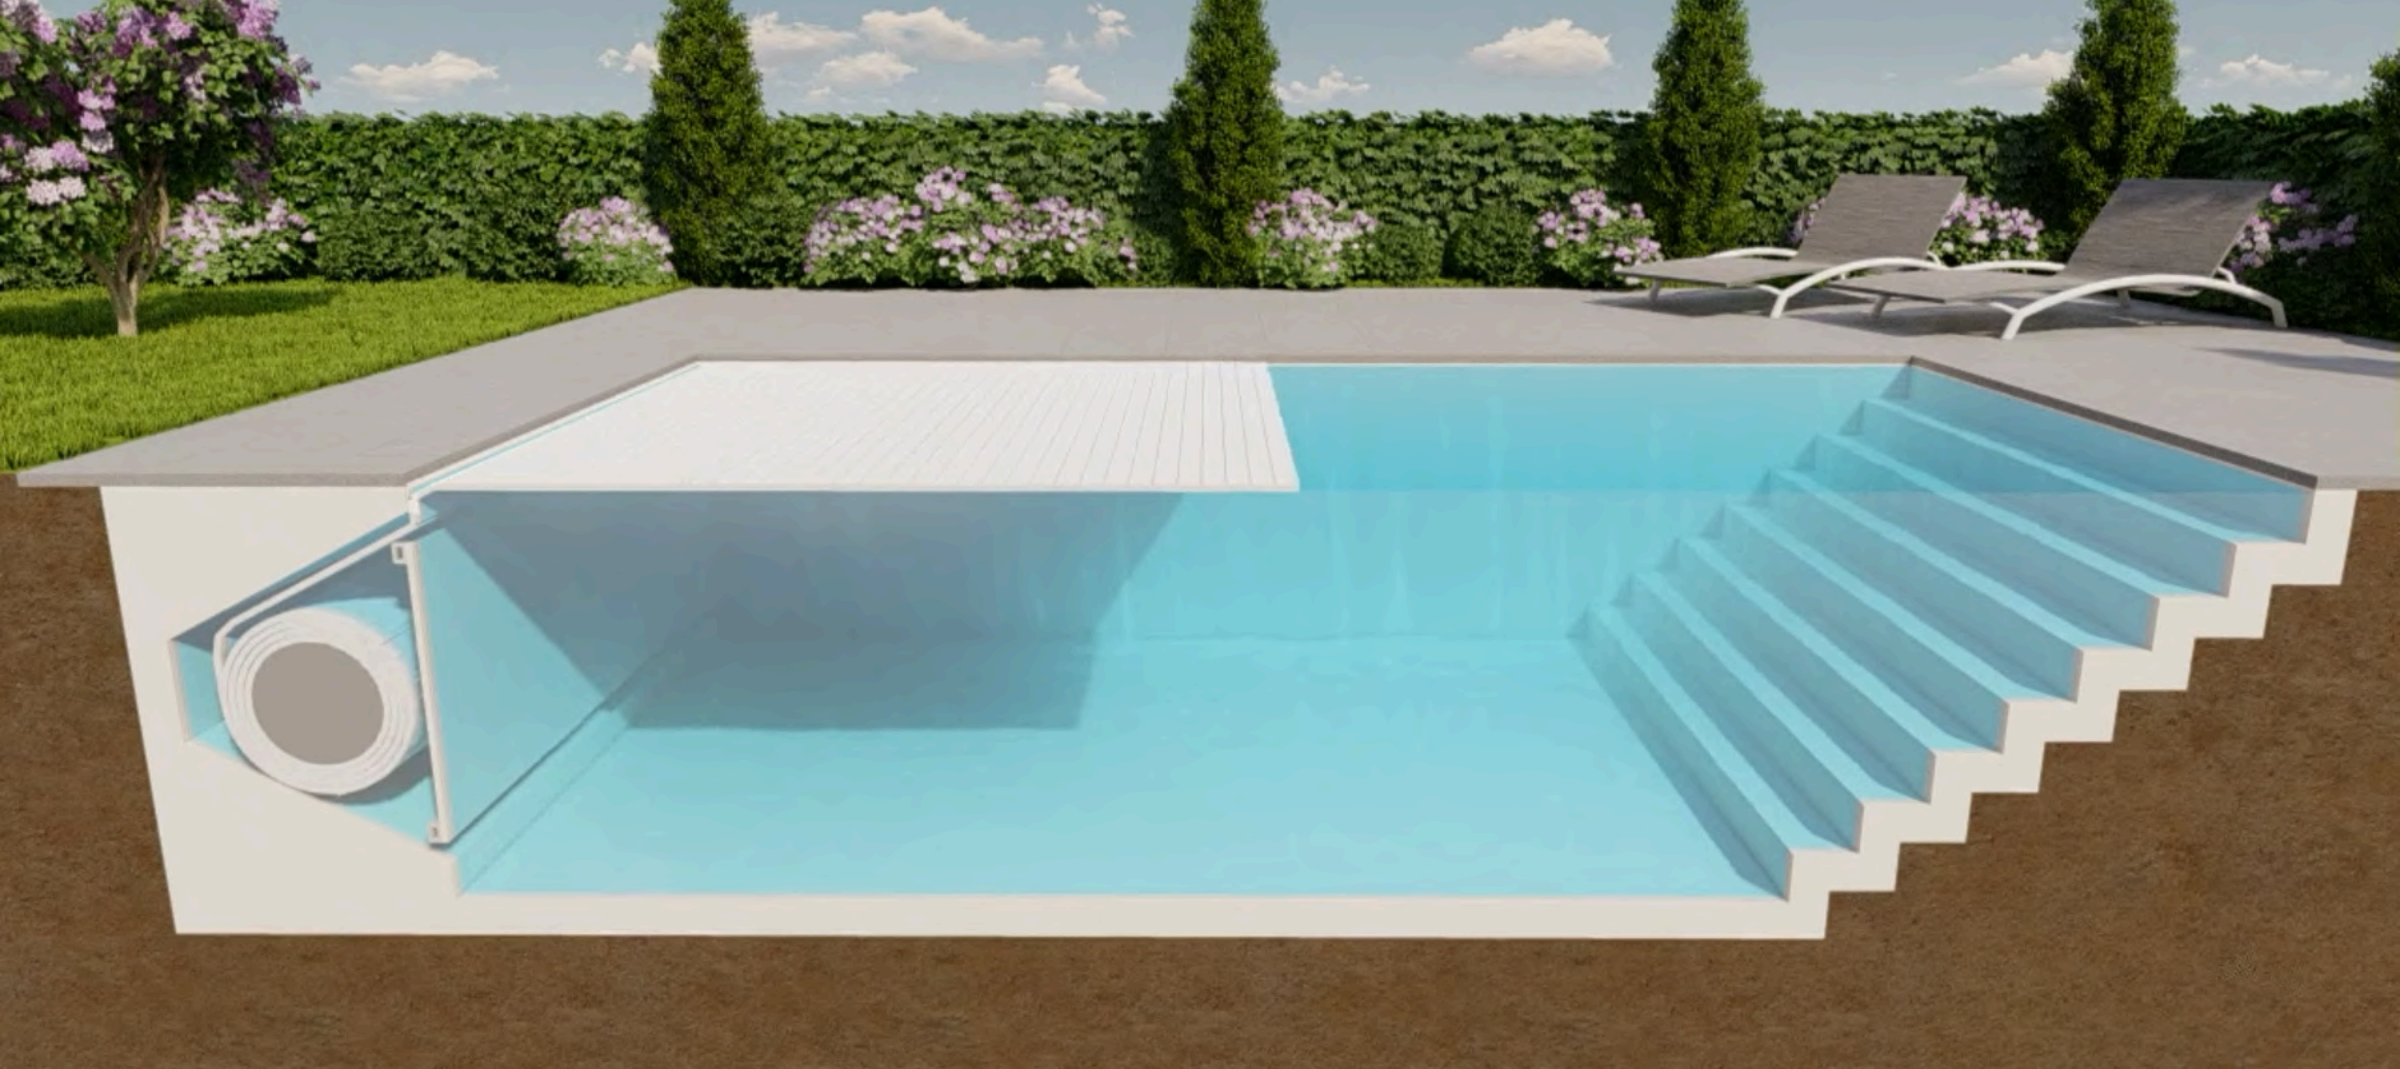

UNDERWATER MOUNT ON THE BOTTOM FLOOR

(Hidden in floor pit)

The slats are rolled up in a cover pit at the bottom of the pool. This space-saving type of installation is discreet, aesthetic, and ideal for indoor or exclusive pools.

Configuration	Skimmer	Overflow	Infinity
D - Floor	Yes	Yes	Yes

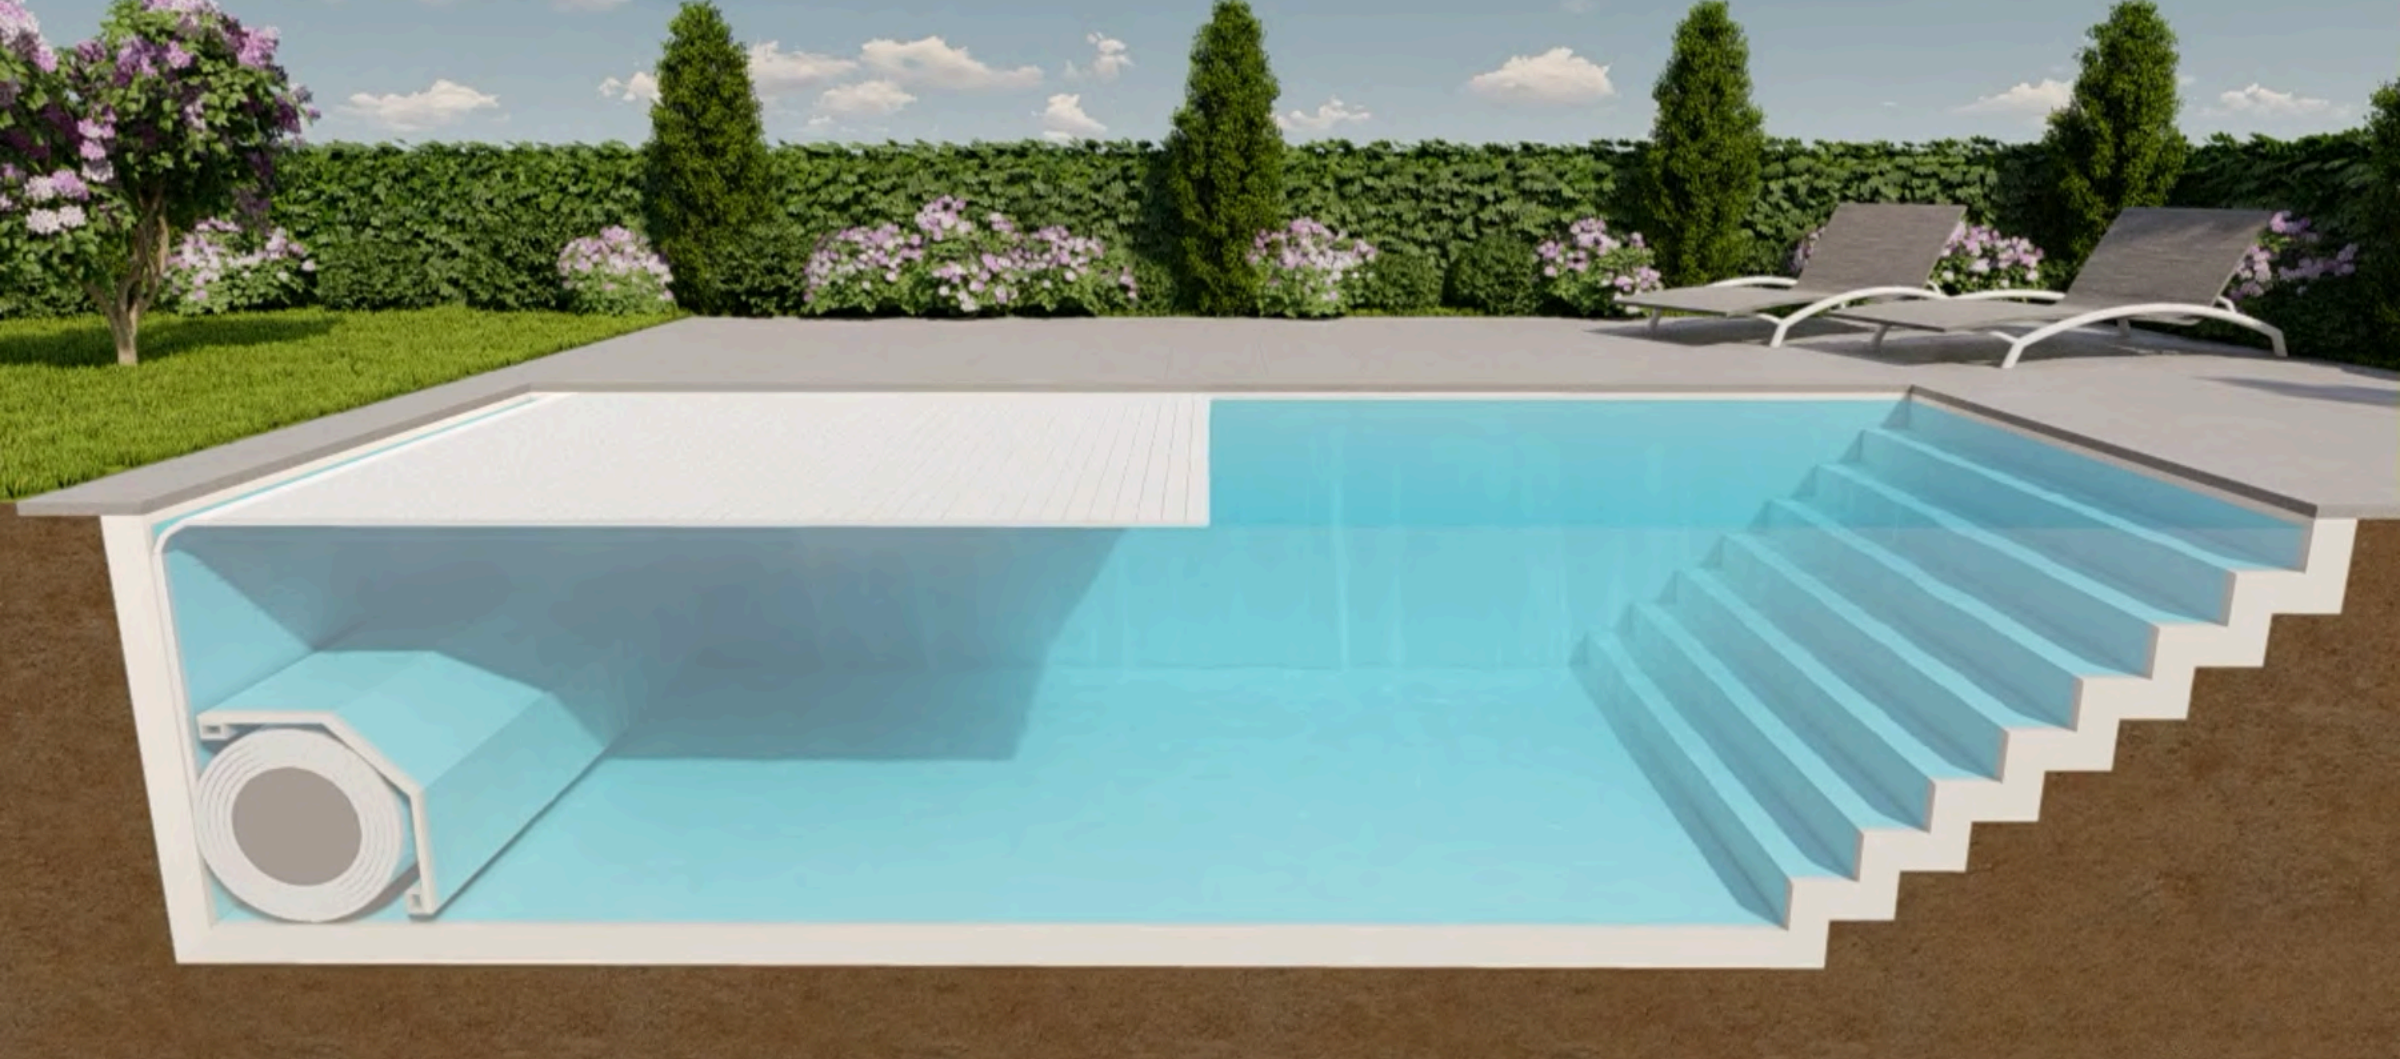

UNDERWATER MOUNT IN THE WALL - BACKPACK

(Above-ground retrofit)

This version is extremely suitable for overflow pools. The cover is integrated in a space inside the pool wall.

Configuration	Skimmer	Overflow	Infinity
E - Backpack	Yes	Yes	Yes

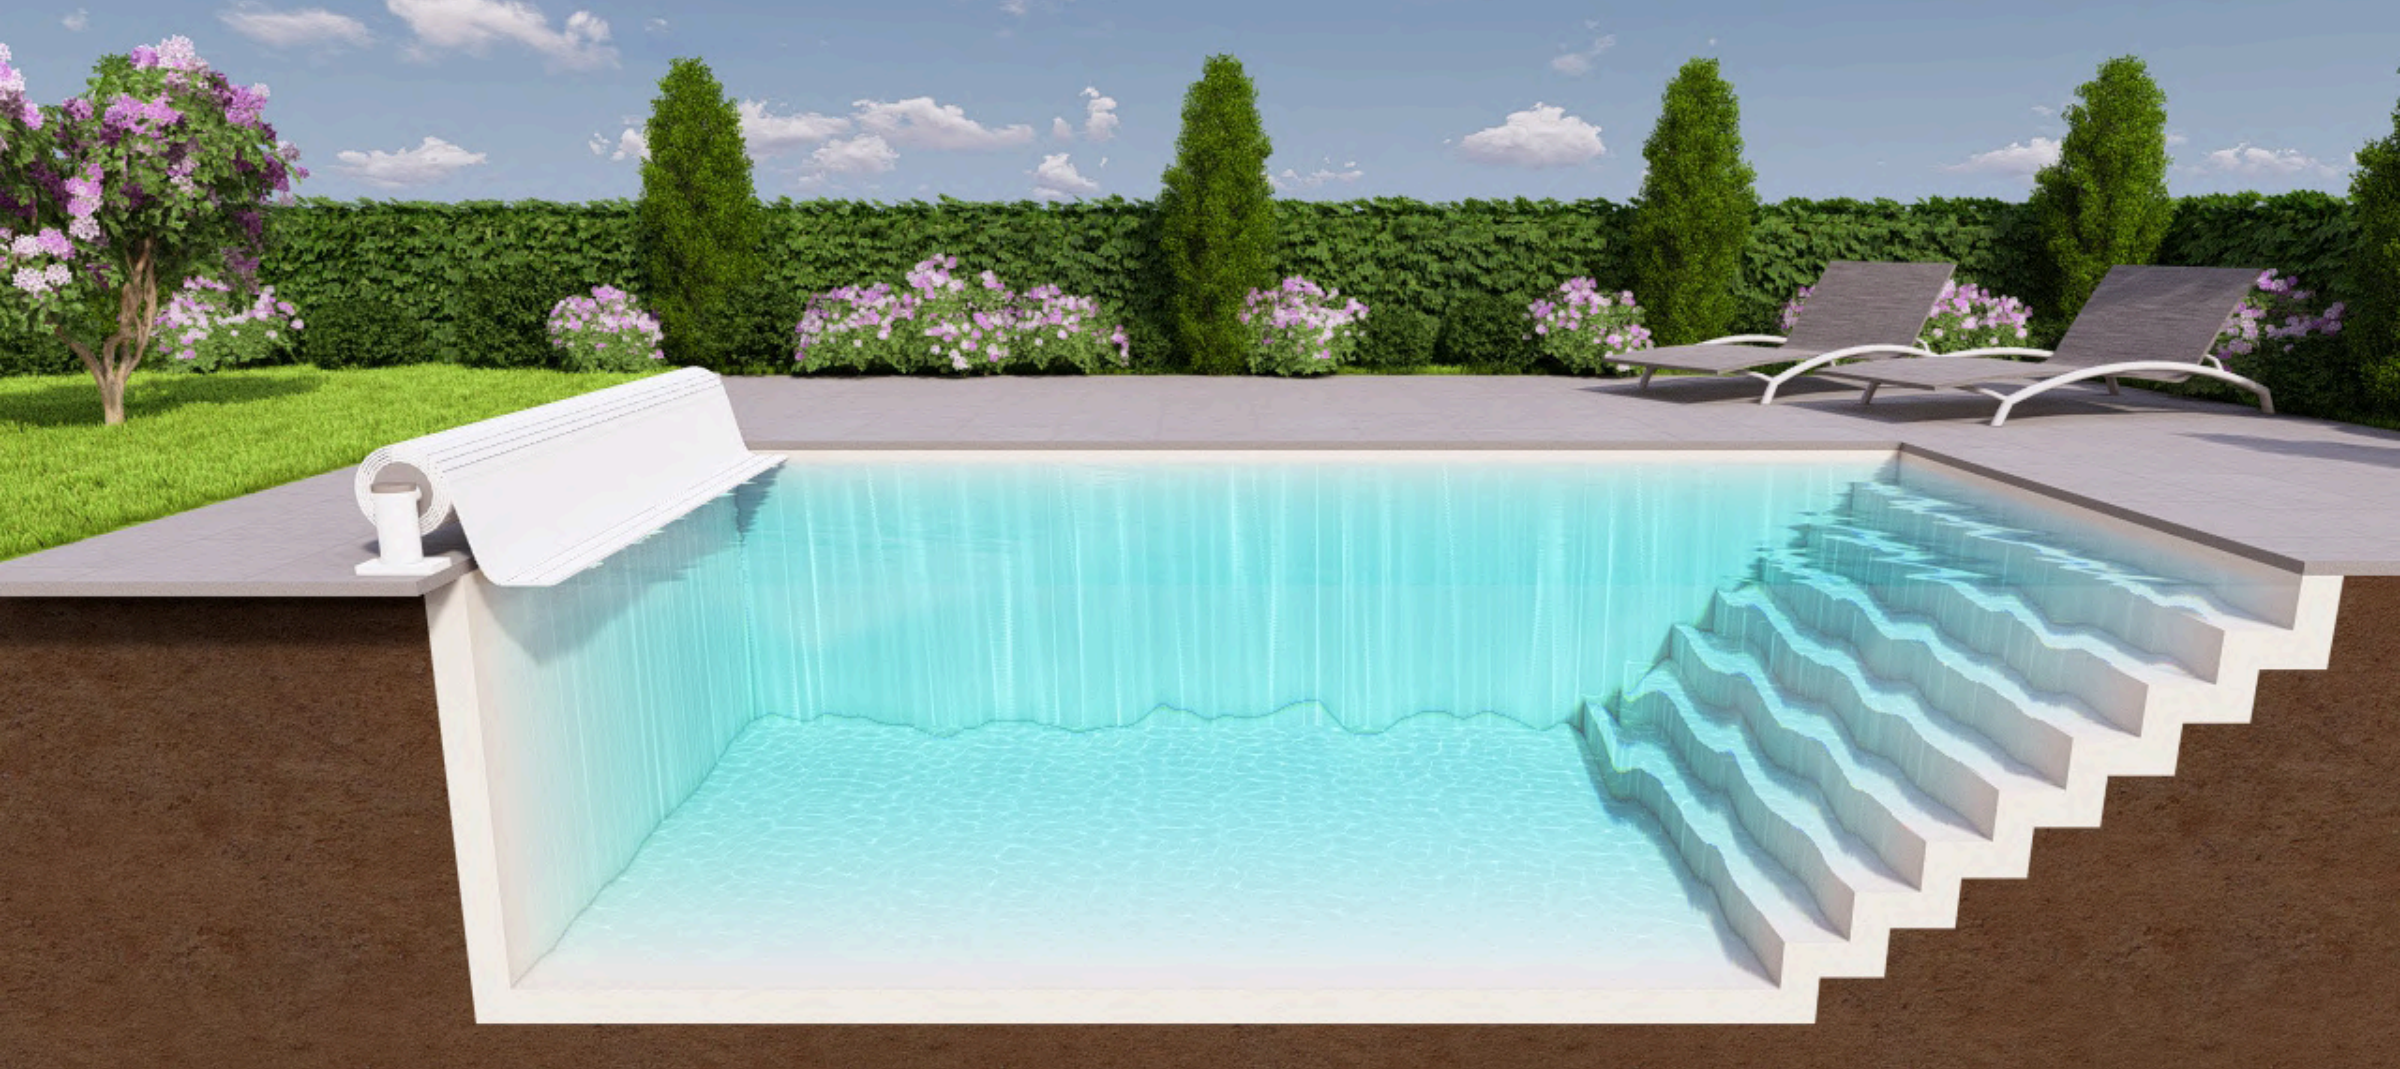

UNDERWATER MOUNT ON BOTTOM - BENCH

(Functional seating integration)

This version is a good solution for existing pools. The pool cover mechanism can be covered with a bench. This bench is available in several colours or as a version to be tiled.

Configuration	Skimmer	Overflow	Infinity
F - Bench	Yes	Yes	Yes

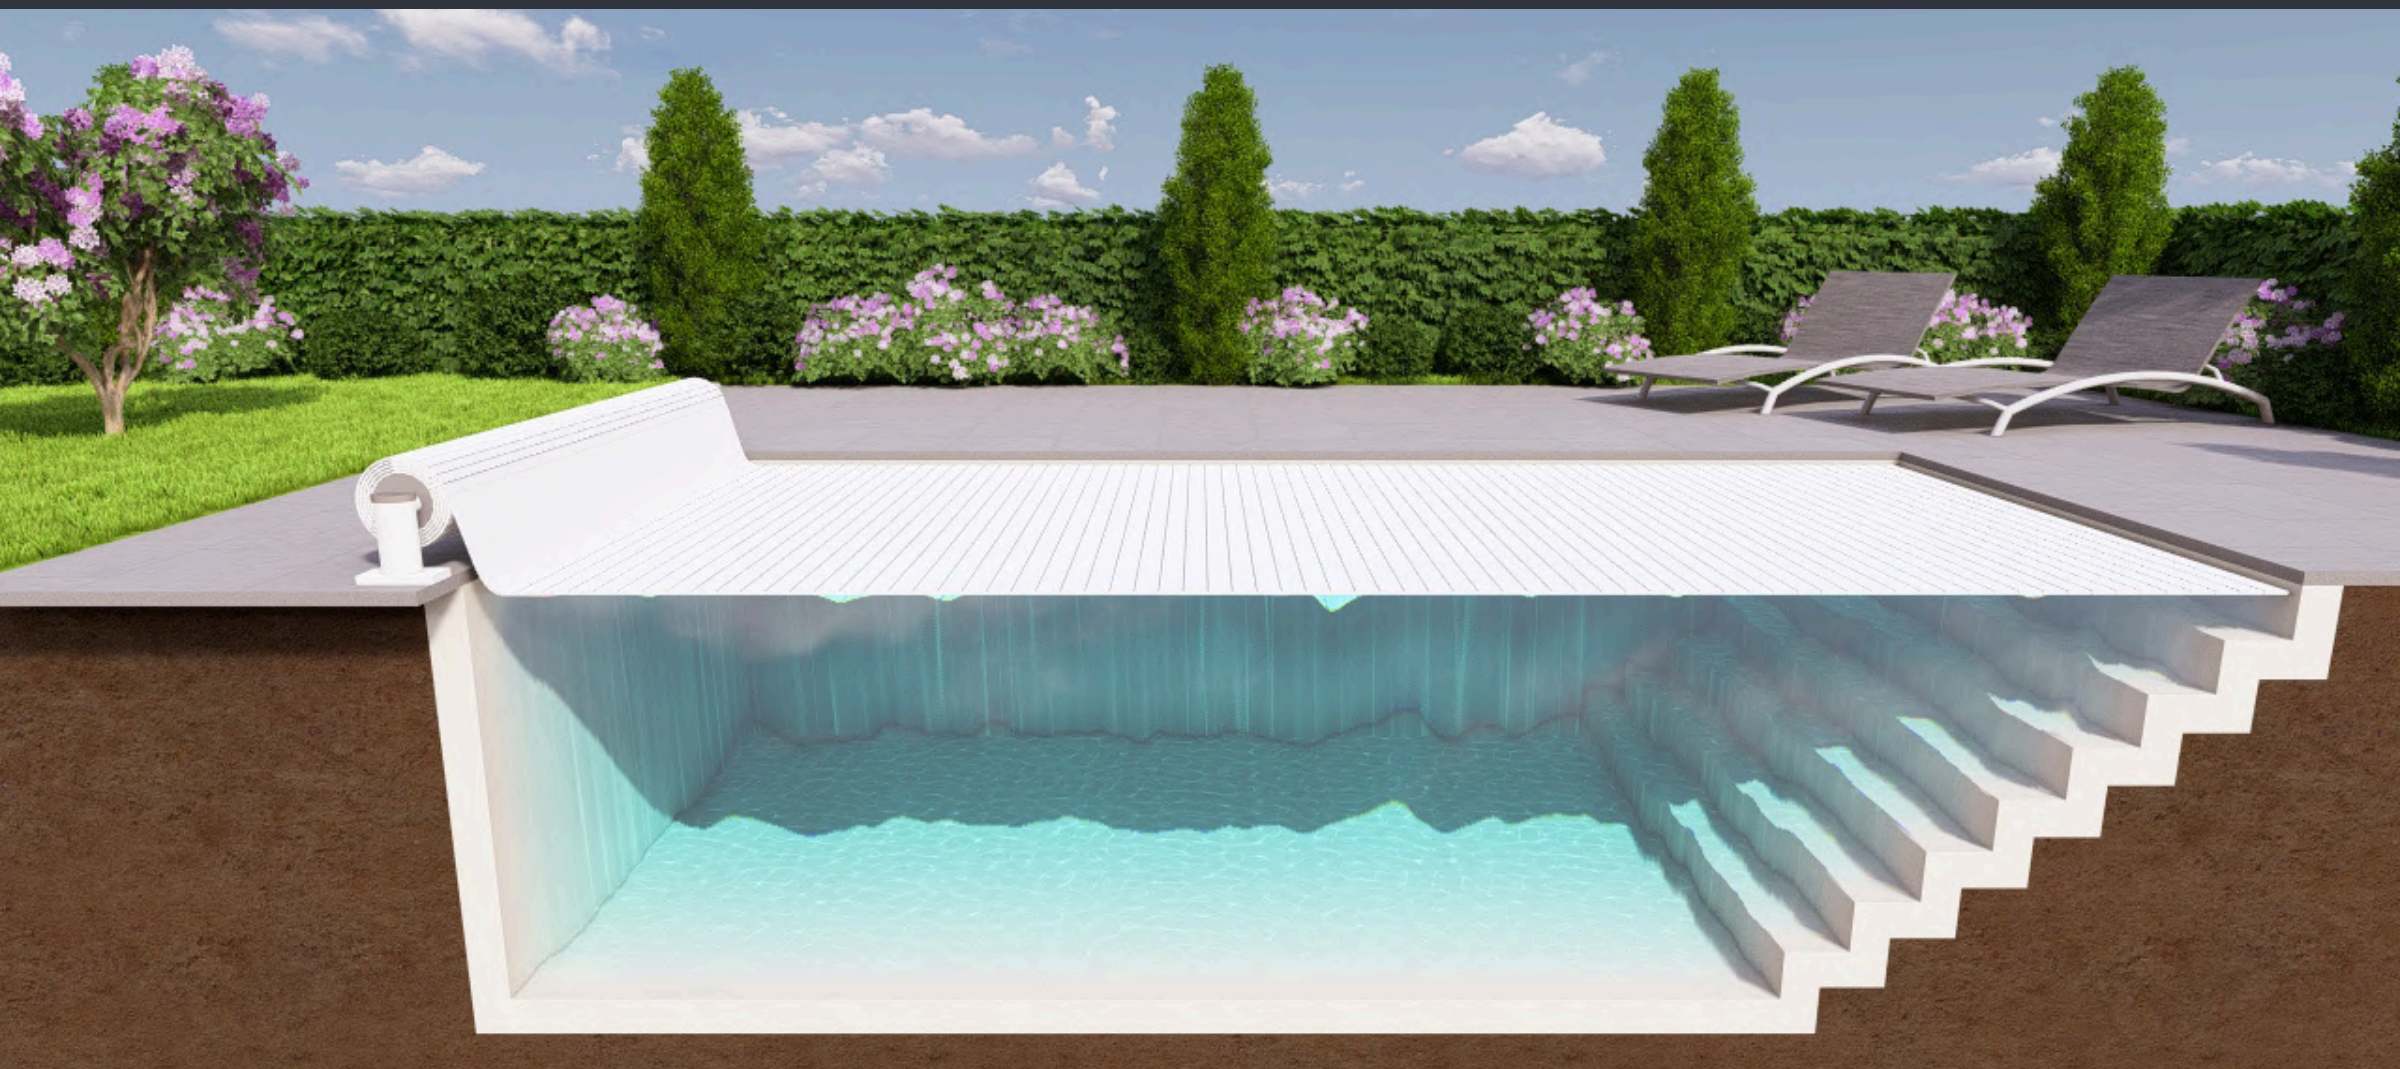

COMING SOON

ROLLO LAND SERIES

(Above-ground retrofit)

A sleek, secure slatted cover designed specifically for already existing pools. Its smart, self-supporting structure allows installation without any structural modifications to your pool, making it an effortless upgrade for safety, cleanliness, and year-round protection. Durable slats, smooth operation, and a clean modern look turn your pool into a low-maintenance, high-style feature.

**INSTALLATION CAN BE
DONE AFTER POOL
CONSTRUCTION**

KEY BENEFITS

Rollo combines sleek aesthetics with cutting-edge performance - offering discreet safety, clean water, and long-term savings without compromising design.

Up to 85% savings on energy and water

Secure and load-bearing, compliant with international safety standards

Low maintenance with UV-resistant materials built for GCC climates

Automated opening/closing with seamless motor integration

Fully customizable design to blend with modern architecture

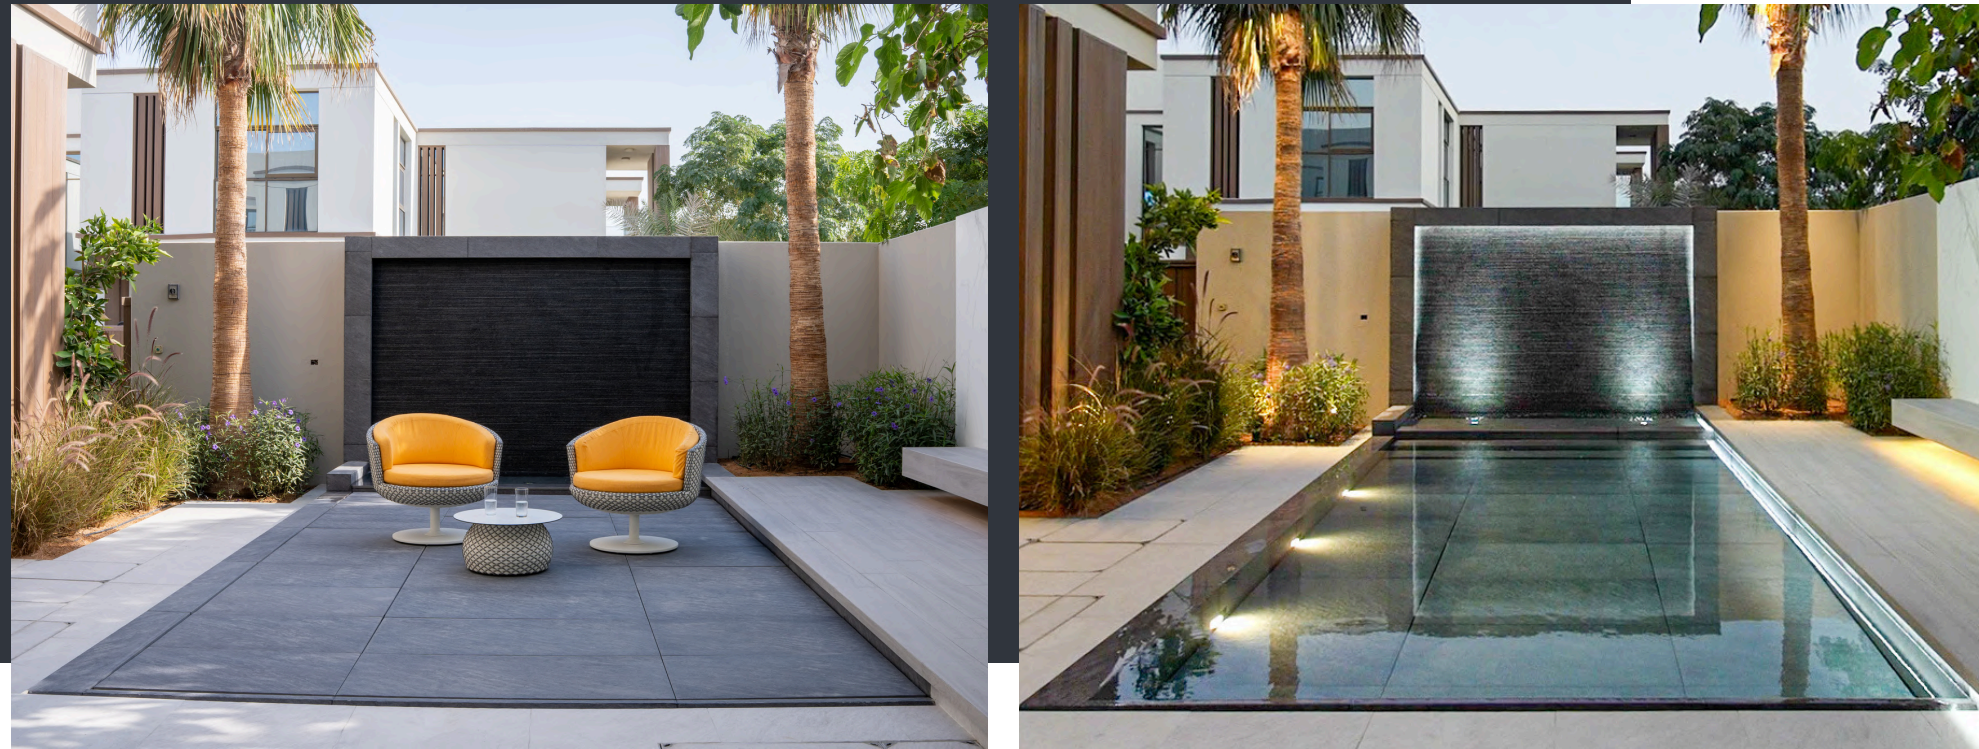

Suitable for skimmer, overflow, and infinity pools

ADJUSTABLE DEPTH. MAXIMUM FUNCTION.

MOVABLE FLOOR

A movable pool floor is the ultimate expression of smart luxury, transforming your pool from a full-depth to shallow wading area, or into a usable dry deck at the touch of a button. Ideal for compact urban homes, luxury hotels, and wellness spaces, it delivers unmatched safety, versatility, and property value.

WHY MOVABLE FLOOR?

Dual-Purpose Structure

Adjustable Water Depth

Hidden, Seamless Design

When closed, the surface becomes a walkable platform that safely seals the pool—perfect for entertaining, events, or reclaiming outdoor space. Precision engineering ensures it stops at any depth for fitness, rehab, or family use, while its durable, load-bearing structure supports heavy use without compromise.

CONFIGURATIONS & OPTIONS

MAX SIZES

The sizes are 100% customized

POWER SUPPLY

Electric motorized systems for lifting and lowering

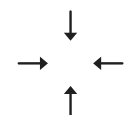

AUTOMATION & SAFETY

Sensor systems to detect obstructions and prevent entrapment

DEPTH ADJUSTMENT RANGE

Fully adjustable from deck level to full pool depth.

WATER MANAGEMENT

Integrated overflow drainage systems to manage displaced water

STRUCTURAL OPTIONS

Standard floor or load-bearing design to support furniture and foot traffic

KEY BENEFITS

With a movable floor, your pool becomes more than a pool—it's a convertible, multifunctional centerpiece engineered for the modern lifestyle.

Enhances property value and aligns with sustainable living

Smart aesthetics with customizable surface materials

Insulating cover reduces energy use and water loss

Multi-depth adjustment for kids, therapy, or full swim mode

Zero access risk when sealed—complete peace of mind

Doubles as a patio when closed—maximizing functional space

WHY IS POOL COVERS IMPORTANT?

In the arid climate of the UAE, swimming pools are a common luxury, but they come with a hidden cost: over one billion litres of water evaporate from these pools annually. This staggering figure was highlighted in a recent article by Daniel Bardsley for The National, emphasizing the urgent need for water conservation measures in the region.

One of the most effective solutions proposed is the use of pool covers. These covers can significantly reduce water loss by minimizing evaporation, especially during the hot summer months. Beyond water conservation, pool covers also offer additional benefits such as maintaining pool temperature, reducing chemical usage, and keeping debris out, thereby lowering maintenance efforts and costs.

Implementing pool covers is a practical step towards sustainable living in the UAE, aligning with the country's broader environmental goals. As water scarcity becomes an increasingly pressing issue, simple measures like this can make a substantial difference.

BESPOKE ENGINEERING FOR COMMERCIAL PROJECTS

OUR SOLUTIONS ARE BUILT TO SUPPORT COMPLEX BUILDS AND HIGH-DEMAND ENVIRONMENTS SUCH AS:

-  Luxury real estate developments
-  Hotels & resorts
-  Public and school pools
-  Rehabilitation centers
-  Sports facilities

WHAT WE OFFER

WHY PROFESSIONALS CHOOSE MYPPOOLCOVER

Fully customizable engineering and CAD drawings tailored to your specific project requirements

Comprehensive consultation, detailed design, and site-specific adaptation services to meet your project's unique needs

Locally available spare parts and dedicated service teams based in the UAE to ensure fast and reliable support

Thermal insulation solutions designed to meet energy efficiency standards and regulatory compliance

Strategic partnerships and co-branding opportunities available to enhance market reach and brand visibility.

WHAT SETS US APART

MADE IN UAE

Championing Local Innovation, Empowering Homegrown Talent, and Ensuring Excellence in Domestic Design, Manufacturing, and Delivery.

ENERGY SMART

Achieve Up to 85% Reduction in Operational Costs Through Intelligent, Sustainable, and High-Efficiency Energy Solutions.

SAFETY FIRST

Engineered with CE-Certified, Child-Safe Designs to Ensure Maximum Protection, Peace of Mind, and Compliance with International Safety Standards.

END-TO-END SERVICE

From Initial Design to Final Delivery and Ongoing Support, We Manage Every Step to Ensure a Seamless, Worry-Free Experience.

EXPERTLY ENGINEERED

Combining European Precision with Deep Local Expertise to Deliver Superior Quality, Performance, and Reliability.
